We are interested not only in the amount of garden waste collected but also in understanding its composition. We see on your website the types of material you accept in your brown bin but we would love a breakdown of what on average you receive the most. For instance,does your council area receive mostly leaves,grass,or other materials?</p> <p>We are contacting South Ayrshire council in particular as the decision to separate garden waste from food waste is not only more environmentally friendly,but allows us to perform a separate analysis from food waste.</p> <p>Any help you could offer,whether it be unpublished figures or guidance on where to find relevant findings,would be greatly appreciated.</p>

1. I firstly wanted to ask are you aware of what percentage of the residents in the area don't actually recycle?
2. Do you know roughly the amount of recycling you get sent every year in tonnes?
3. What percentage of recycling is turned away simply because it's not been cleaned?
4. One of the things we are looking at specifically is single-use plastic in the country, out of the plastic that's sent to you what would you say is the percentage that is actually non-recyclable?
5. We've been thinking especially about gluesticks, gluesticks do vary from the area, specifically in the local area do you advise that they just go into the landfill due to the adhesive?
