LP	18/01/2022	ICT Data Centre "Hosting and Delivery Model	["CEO"]	Mullen, Kevin	Business Engagement on DR is in progress and ongoing.	Yes			<p>Engagement process commenced to identify applications/servers for early adoption migration to Azure. Supplier engagement recommends as we are migrating services to Azure and closing our data centre's, we should migrate production servers to reduce duplication and to avoid duplicate costs. Contract award requires to occur prior to initiating the migration of any services and this is due to occur early June. The project implementation team has been created, internally and externally to allow progression upon contract award. Request date is changed to end of July to allow progression.</p> <p>Original date was 21/2/22. 29/7/22 agreed on 14 June 22</p> <p>Closure statement - works on phase 1 are progressing and live services are being migrated on the grounds of technical complexity. Plans are to close the data centre's and based on the separation of Live and DR services, the plan is to migrate production services.</p>	Davis, Ian
