Redevelopment Opportunities

Introduction

The purpose of this brochure is to maximise development in South Ayrshire by highlighting the most significant redevelopment opportunities identified in the proposed South Ayrshire Local Development Plan and to outline the types of development that would be appropriate on these sites, in a succinct and user friendly format.

Relationship with the Local Development Plan

The brochure supplements and complements the policies of the Local Development Plan by providing a description of the site and an indication of the type of uses that may be acceptable on the site. The opportunity sites shown in the proposed Local Development Plan are blanked out, so the guidance contained within the brochure relating to those sites constitutes the development plan position. The range of preferred uses will be considered as the development plan position on these sites.

The statutory link to the development plan, which gives this brochure the material weight of the development plan is contained within LDP Policy Development Opportunities, which is shown below: -

LDP policy: development opportunities

We will actively encourage development on brownfield sites instead of greenfield sites.

To strengthen the vitality and vibrancy of all town centres, we will encourage the redevelopment of town-centre brownfield sites over other potential sites outside of town centres.

Redeveloping these sites offers an opportunity to achieve the best sustainable economic growth, so we will prepare a redevelopment opportunities schedule which will identify specific sites and suitable uses for those sites.

Redevelopment Opportunity Sites

The process of change is accepted as an essential element of economic survival. Some of this change involves processes or activities, which are unable to be accommodated in existing land and buildings. This cyclical change has, in some locations, resulted in significant areas of vacant or derelict land and buildings. Land which has previously been developed, and which now lies vacant or derelict represents a wasting economic resource which often detracts from the overall environmental quality of an area. The brochure identifies sites which have the greatest potential for redevelopment.

The successful redevelopment of site into productive use can have many benefits, such as limiting the need for building on greenfield sites. Furthermore, the redevelopment of brownfield sites within settlements can contribute to the objectives of sustainability by providing new services and facilities close to existing services and centres of population. Redevelopment opportunity sites in this brochure have been identified as being appropriate for a wide range of uses including business, industry, housing, retail, leisure and tourism.

A number of redevelopment sites are located within, or adjacent to, established town centres. These sites are of particular importance in terms of providing high quality development opportunities which will support and strengthen the vitality and viability of the town centres, making them more attractive for continued private sector investment. For these reasons, the development of these sites is considered preferable to alternative out-of-centre sites, where they could accommodate a use that is compatible with the town centre (guidance on acceptable town centre uses is contained within the LDP). Given the importance of these sites and their excellent potential for re-use, the Council will seek to ensure that they are developed in a comprehensive rather than piecemeal manner.

At the time of publication of this document, Scottish Water promote the use of their 'Pre-Development Enquiry' service whereby prospective developers can fill out a 'Pre-Development Enquiry Form' to enable an assessment of whether Scottish Water is able to provide planned development with water and/or drainage services. Scottish Water encourages the submission of the PDEF at an early stage in the consideration of development sites to ensure that applicants are fully aware of the infrastructure requirements of their site. The form can be found on Scottish Water's website.

Redevelopment Opportunities

Identification and Selection of Sites

Redevelopment opportunity sites were identified in a number of ways, including; -

- Sites submitted in response to the call for sites;
- Sites that remain undeveloped from the South Ayrshire Local Plan Development Opportunities Brochure;
- Known redundant sites;
- Data from vacant and derelict land surveys;
- Data from industrial land supply.

Sites that were identified were subjected to a detailed assessment process, which was established for the Local Development Plan to meet SEA requirements. This involved a desk-based constraints identification process, where constraints were identified and scored in accordance with the predicted severity of the constraints. A site report was then completed for each site to provide a qualitative analysis of the identified constraints. The output of this process was environmental recommendations, which were fed into the brochure. In turn, the brochure itself indicates any implications of constraints for the development sites.

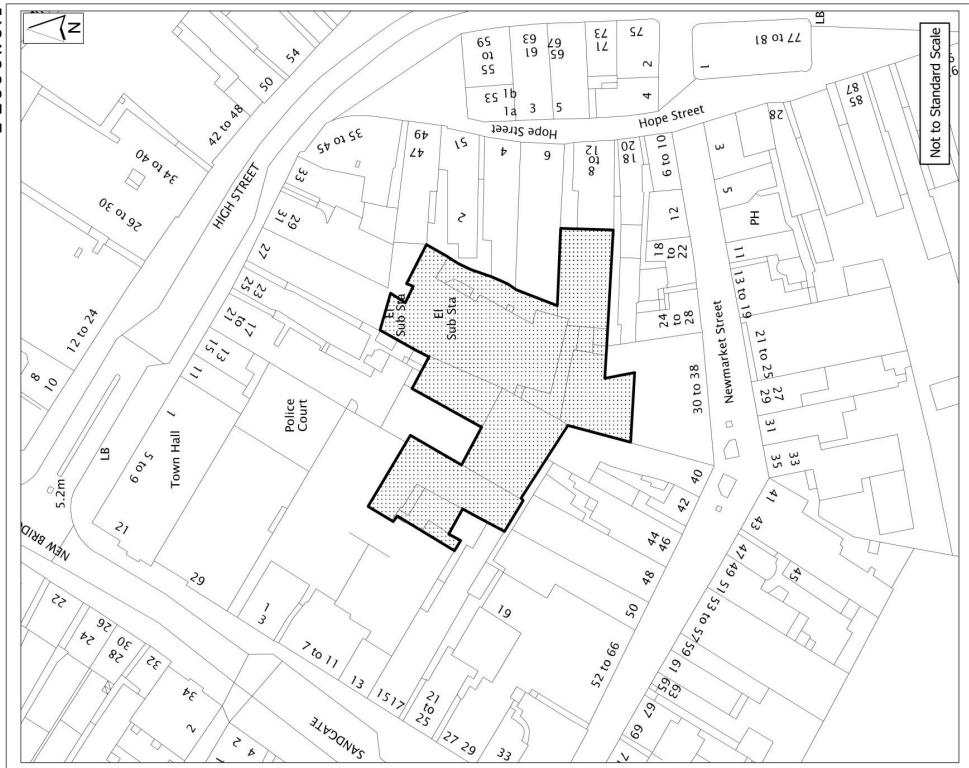

Redevelopment Opportunities

Sites

Site Details		Planning Details		Environmental Recommendations	
Site Reference	RO1	Local Development Plan Policies	Town Centres, Historic Environment, Development Opportunities	Consultation with the Council in terms of site access and archaeological resources should ensure that there are no adverse impacts upon either. The development should include sustainable design solutions and incorporate carbon reducing technologies, where feasible.	
Settlement	Ayr	Preferred Uses	Retail, Leisure, Tourism, Office Residential		
Site Address	Afflecks	Further Details	The site is located within Ayr town centre, highly accessible by public transport. Access would require to be taken through the acquisition of properties on High Street, Newmarket Street or Hope Street.		
Site Area	0.2 hectares				
OS Grid Reference	NS337220

Site Details					
Site Reference	RO3				
Settlement	Prestwick				
Site Address	Callander Road				
Site Area	4.1 hectares				
OS Grid Reference	NS359239				
Planning Details					
Local Development Plan Policies	Heathfield, Development Opportunities				
Preferred Uses	General Industry, workshop, small scale/ancillary office, business use, storage and distribution uses				
Further Details					
Located within the established Heathfield Industrial Estate. Immediate access available onto Heathfield Road and the A77 at Whittlets Roundabout.					
Environmental Recommendations					
Consultation with the Council's Roads Service and Environmental Health Service as part of the planning application process should ensure no adverse impacts upon road network capacity or noise.					
Given the proximity to the trunk road network and associated cumulative implications with other sites within Heathfield, consultation with Transport Scotland may be necessary to scope and agree any individual or cumulative assessment that may be required.					
The development should include sustainable design solutions and incorporate carbon reducing technologies, where feasible.

Site Reference	RO4
Settlement	Ayr
Site Address	Doonfoot Road
Site Area	1.3 hectares
OS Grid Reference	NS359239
Planning Details	
Local Development Plan Policies	Residential Policy within Settlements, Release Sites and Windfall Sites, Development Opportunities
Preferred Uses	Residential, Hotel, Care Home
Further Details	
	The site is close to Ayr town centre and the seafront. Contained within the site are numerous mature trees which are covered by a tree preservation order. The site contains Seafield House which is listed at Category B.
Environmental Recommendations	
	Any development within this site will be required to preserve the setting of Seafield House as well as features of special architectural or historic interest. The content of LDP policy: historic environment will play a pivotal role in the assessment of any development proposals for this site. Any development should include sustainable design solutions and incorporate carbon reducing technologies, where feasible.

Site Details	
Site Reference	RO7
Settlement	Ayr
Site Address	Lochside Road
Site Area	6.5 hectares
OS Grid Reference	NS353232
Planning Details	
Local Development Plan Policies	Heathfield, Development Opportunities
Preferred Uses	General industry, workshop, small scale/ancillary office, business use, storage and distribution. The Council is supportive of the proposed development of a new football stadium for Ayr United at South Sanquhar. Within the hatched area, shown in the LDP—to the south of the site residential development will also be supported.
Further Details	
<p>The site benefits from good road links to the A77 (T) and the wider road network. Any application for the development of this site should demonstrate that full consideration has been given towards the transport implications of the development, particularly where there are implications for the nearby trunk road network.</p> <p>It occupies a large, flat area within an established industrial area. A haulage railway line runs along the southern boundary of the site. The upper reaches of the Half Mile Burn dissect the site.</p>	
Environmental Recommendations	
<p>Consultation with the Council's Roads section and Environmental Health as part of the planning application process should ensure no adverse impacts upon road network capacity or noise.</p> <p>Given the proximity to the trunk road network and associated cumulative implications with other sites within Heathfield, consultation with Transport Scotland may be necessary to scope and agree any individual or cumulative assessment that may be required.</p> <p>Potential flooding issues associated with the watercourse should be assessed. Where development proposals could have implications for the Half Mile Burn, the developer will be expected to enter into discussions with SEPA prior to the submission of any planning application. SEPA will also be consulted as part of the planning application process, where necessary.</p> <p>The development should include sustainable design solutions and incorporate carbon reducing technologies, where feasible.</p>

Site Area	0.96 hectares
OS Grid Reference	NS345228
Planning Details	
Local Development Plan Policies	Residential Policy within Settlements, Release Sites and Windfall Sites, Development Opportunities
Preferred Uses	Residential/light industry
Further Details	
Local Development Plan Policies	The site is located within the heart of Ayr's urban area, adjacent to existing industry, relatively high density traditional housing and is situated to the north of a freight railway line. At present, the site accommodates a large four storey brick built mill/warehouse.
Environmental Recommendations	
Local Development Plan Policies	Consultation with the Council's Road Service and Environmental Health Service as part of the planning application process should ensure no adverse impacts upon the environment. The development should include sustainable design solutions and incorporate carbon reducing technologies, where feasible.

Preferred Uses	General industry, workshop, small scale/ancillary office, business use, storage and distribution.				
Further Details					
The site is within an established industrial area. It has good links to the A77 (T) and the wider road network. The site is currently occupied by the frame of a large building which was left incomplete. There is therefore an opportunity to utilise this building or to clear the site entirely. The Half Mile Burn runs along the edge of this site.					
Environmental Recommendations					
<p>Consultation with the Council's Road Service and Environmental Health Service as part of the planning application process should ensure no adverse impacts upon the environment. Potential flooding issues associated with the watercourse should be assessed. Where development proposals could have implications for the Half Mile Burn, the developer will be expected to enter into discussions with SEPA prior to the submission of any planning application. Site Details	
Site Reference	RO16
Settlement	Prestwick
Site Address	Whittlets Roundabout (North)
Site Area	2.0 hectares
OS Grid Reference	NS363234
Planning Details	
Local Development Plan Policies	Heathfield, Development Opportunities
Preferred Uses	Office, computer research and development, micro engineering, biotechnology, light industry and sale/display of motor vehicles, roadside facilities including hotels, restaurants and petrol filling stations.
Further Details	
	<p>Part of the site has a frontage and access onto Heathfield Road and it offers easy access to the A77 (T). The site is effectively split into two areas as a result of the development of a hotel, which has recently closed and which could potentially constrain the northern part of the site.</p>
Environmental Recommendations	
	<p>The development should be accompanied by a transport assessment at planning application stage.</p> <p>Given the proximity to the trunk road network and associated cumulative implications with other sites within Heathfield, consultation with Transport Scotland may be necessary to scope and agree any individual or cumulative assessment that may be required.</p> <p>Any development should incorporate sustainable design solutions and carbon reducing technologies, where possible.</p>

Site Details	
Site Reference	RO17
Settlement	Girvan
Site Address	Former Nursery School
Site Area	0.7 hectares
OS Grid Reference	NS194976
Planning Details	
Local Development Plan Policies	Development Opportunities
Preferred Uses	Business, Garden Centre, Community Facilities
Further Details	
	<p>The site is situated outwith the settlement boundary, in a semirural location. It is separated from the town by the adjacent railway line and benefits from good road access.</p> <p>A minor watercourse runs adjacent to the site.</p>
Environmental Recommendations	
	<p>The design solution of the site should take care to minimise its impact on the rural setting for Girvan, by incorporating appropriate building height and landscaping. The development should ensure appropriate pedestrian linkages exist between the site and settlement.</p> <p>Any development should incorporate sustainable design solutions and carbon reducing technologies, where possible.</p>
